Adventure Kit Instructions

So often, we think that to have a grand adventure we have to travel to a foreign land with wild animals and treacherous journeys. But local artist Margaret Willis believes that you don't have to go beyond your own front door. With help from some common household items (hello upcycling!) and a little imagination, your own home and neighborhood can be a source of wonder, excitement, and discovery! First steps: imagination and creativity!

1. Decorate and personally design your binoculars and either a magnifying glass or flashlight to fit your unique style.
2. Launch a scavenger hunt in and around your home for the wild creatures and places on this list!
3. Make a map showing where you found all of the items from your scavenger hunt, and add more that you find in your particular environment!

Scavenger Hunt!

Using your handy binoculars (and imagination) to spot these creatures, critters, and biospheres!
